EXPERIENCE

Dark Heart Labs

2015 – Present

Software Developer — Independent · Remote

- Shipped public HTML/CSS/JavaScript and Jekyll properties at darkheartlabs.technology, including 289 dated essays, search, CI link checks, and CMS how-tos.
- Built the NeuroShell SwiftUI interface (28 Swift source files) and the task-oriented user docs selected from 170+ applicants for the Human-Focused AI Award.
- Implemented two WCAG 2.1 AA Rails ViewComponents (keyboard path, what the user hears, what to test) with a live Render demo.
- Built nightbind (TanStack Start / React 19 / TypeScript, 59 TSX files) and metalmenders (React, Express, PostgreSQL, Drizzle, 53 TSX files); published 56 editor themes with validate-themes CI.

365 Connect LLC

2003 – 2015

Web Developer — On-site 2003–2007 · remote 2007–2015

- Delivered front-end UI and in-product help text for a property-management platform (WordPress, Drupal) across a 12-year tenure.
- Implemented responsive CSS and JavaScript so the platform held layout and interaction across devices.
- Partnered with design on accessibility; used observed user behavior to fix help-text and interface bottlenecks.
